

Functional Programming with Scala

Project Title: FP Project

Group Name: Group 5

Desbos, Lénaïs

IG5.Polytech

November 19, 2024

- **Your Specific Contribution:**

- I tried to prepare the query to clean data.

- **Methodology or Approach:**

- First I tried to clean from json file directly while they were putting neo4j et MongoDB correctly.
- Second I prepared the query for neo4j data.

- **Challenges Faced and Their Resolutions:**

- First, didn't have neo4j and mongoDB ready. I resolved this by trying to clean the data directly from the json file.
- Second, it didn't work but neo4j was ready. I prepared the query for using neo4j directly.
- Third, didn't have time to test my code and couldn't resolve this project.

- **Learning Gained:**

- I am not able to do a project with difficulties to access the data in only an hour.

- **Future Improvements:**

- Ask more about how to have access to data before the exam.
